GENERAL SPORTS AUTHORITY

President of the General Sports Authority Message

It is with great pleasure and pride that the Kingdom of Bahrain is once again hosting the Under 18 Asian Volleyball Championship, which will be held from July 28 to August 4, 2024.

The organization of this championship reflects our deep commitment to promoting sports as a means of bringing people and cultures together and supporting youth as the foundation of a brighter future. It also demonstrates our keen interest in attracting a variety of sporting events to our region, such as volleyball.

Sports are not just about competitions and titles, but a universal language that brings together different cultures and builds bridges of love and friendship between nations. By hosting this championship, we affirm the importance of sports in fostering values of cooperation, mutual respect, and teamwork.

The Under 18 Asian Volleyball Championship represents a golden opportunity for young athletes to shine, gain more experience, and develop their sports skills. We are confident that the participating teams will give their best efforts to achieve the best results, and this championship will witness fierce competition and high levels of sports performance. We are delighted to continue our cooperation with the Asian Volleyball Confederation, based on their trust in Bahrain's capabilities and experience in organizing championships.

I cannot but commend the efforts of the Bahrain Volleyball Association, chaired by Shaikh Ali bin Mohammed Al Khalifa, the Organizing Committee, and the volunteer teams. I also extend my gratitude to all the supporting and sponsoring entities for the championship and wish our national team and all the participating teams the best of luck and success.

His Highness Shaikh Khalid bin Hamad Al Khalifa
First Deputy President of the Supreme Council for Youth and Sports
President of the General Sports Authority

AVC President Message

Message

President of Bahrain Volleyball Association, All Participating Teams, All AVC Officials, All Local staff:

It is my great pleasure to send this message to all of you at the 15th Asian Men's U18 Volleyball Championship, in the city of Manama, Bahrain.

This 15th Asian Men's U18 Volleyball Championship is important for all national teams in Asia and Oceania because it is the Qualification Event for the 2025 FIVB Boy's U19 World Championship next year.

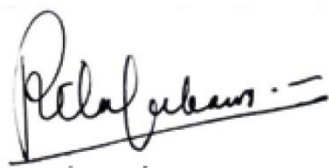

I would like to extend my appreciation to all teams for your participation to find the best 4 teams to join the World Championship.

I have appreciated Bahrain Volleyball Association for the great support and contribution to voluntarily organize this event, in order to continue the AVC spirit.

Any volleyball competitions will not be successful without the kind cooperation of participating teams in technical matters and the organization. I fully trust that appointed AVC Officials will try their best to conduct the Championship fairly and smoothly.

Many AVC events have ever successfully organized in Bahrain. Therefore, I do anticipate that with the experience in volleyball organization, strong capability and unity of BVA, local staff, and all people concerned, this event will be run smoothly and successfully, again.

Good luck to you all.

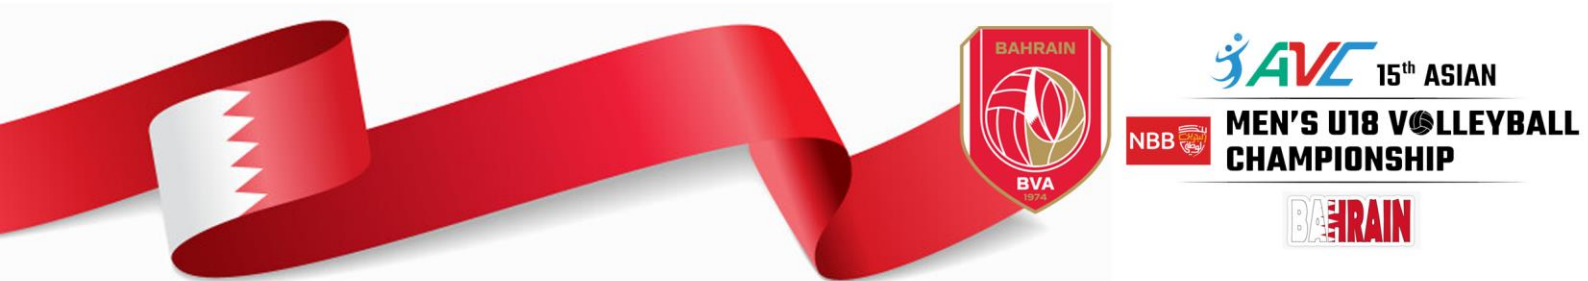

Rita Subowo

BAHRAIN VOLLEYBALL ASSOCIATION PRESIDENT'S MESSAGE

The Kingdom of Bahrain welcomes all teams participating in the Asian U-18 Volleyball Championship.

Hosting this tournament is a valuable opportunity to strengthen brotherly relations between Asian countries, and to highlight the talents of young athletes who are the future of volleyball in the continent. We are proud to host this tournament after organizing the Asian Challenge Cup for Men about two months ago, which reflects the close relationship between the Bahrain Volleyball Association and its Asian counterpart.

Through this tournament, Bahrain aspires to provide another distinctive experience worthy of the Kingdom's reputation in organizing international sporting events, specifically volleyball tournaments, after Bahrain has become a prominent destination for volleyball tournaments, continentally and globally, due to the experience enjoyed by human cadres, the appropriate infrastructure, and all the services and facilities provided by the Association. We also seek to make this tournament a platform for discovering and developing young talents, and promoting the spirit of fair competition and cooperation among all participants

I wish all the participating teams all the best and success, and I urge everyone to enjoy this tournament and take advantage of this opportunity to show the best of their capabilities and skills. I welcome you again to the Kingdom of Bahrain, and I hope that your stay here will be an unforgettable experience full of successes and beautiful memories

His Excellency Sheikh Ali bin Mohammed Al Khalifa
President of the Bahrain Volleyball Association

REGULATIONS AVC VIDEO CHALLENGE SYSTEM.

AVC is committed to using all available a new technology to assist referees in the correct decision-making process. The aim is to increase the accuracy of the referee's decision making and to make the game that is fair for all participants. The Video Challenge System will be applied for Asian senior events or the other events requested by organizer (under the AVC condition)

1. Teams may request a review of playing actions (called "Challenge") that was NOT whistled by the referees; or signaled by line judges, where they suspect a fault during rallies.
2. A Challenge may be requested for the following situations:
 - 2.1 Ball IN/OUT - side lines and end lines, either.. **1. IN, OR 2. OUT**
 - 2.2 Block Touch – contact with the ball by the player (the blocker), either
1. YES, OR 2. NO
 - 2.3 Net FAULT – contact with the net between the antennas by the player in the action of playing the ball, either.. **1. YES, OR 2. NO**
 - 2.4 Antenna Touch – contact with the antenna by the player or the ball, either
1. YES, OR 2. NO
 - 2.5 Foot Faults:
 - a. The server contacts with end line or cross into the playing court or the lateral free zone outside of the service zone at Serve; or
 - b. Back row players (position 1, 5 and 6) contact with the attack line during execution of attack hit; or
 - c. Completely crossing of the center line by the player's foot or feet.
 - d. Penetration fault. Decision is either: **1. YES, OR 2. NO**
 - 2.6 Floor touch. Ball touches the court surface – "Pancake" to determine if the ball contacts the court or did not touch the court during the play (Mid-Rally)
1. YES, OR 2. NO (1. Floor Touch or 2. No Floor Touch)
3. Faults that are NOT subjects to Challenges:
 - 3.1 In AVC competitions, Challenges are limited to the six categories listed in item 2 above. All other faults such as "4-Hits" (Challenging for block touch, however would be possible), catch, ball touch players but not in the blocking action, etc., are NOT the subject of Challenge. To request a Challenge outside the six categories in items 2 will be considered an **INCORRECT CHALLENGE** and will be rejected by referee. Subsequent/Repeated of this nature should be classified as deliberate attempts to delay the game and sanctioned accordingly.
4. Teams can request a Challenge immediately during a rally; or at the end of rally for the final playing action:
 - 4.1 During the rally teams believe that a fault has taken place, but was not called by the referees;
 - 4.1.1 Challenge are requested only by team staff pressing a buzzer immediately after the occurrence of the suspected fault (before a next action is completed) and the buzzer sound will prompt the 1st referee to stop the rally and to confirm the team's intention to Challenge.

- 4.1.2** If a team pressed the buzzer for a mid-rally challenge, but failed to - select and show the proper Challenge sign of fault within 8 seconds - then the referees will reject that challenge, - the team will lose the rally, and - the opponent will gain a point (refer to item 7).
- 4.1.3** A team must clearly indicate the faulty action being challenged with a proper Challenge sign of fault to the referee at the moment of Challenge. The first referee will inform the Challenge referee to review the video images of the identified action being challenge. Images and action that have taken place before or after that specified challenge action are NOT to be the subject of review by the Challenge referee.
- 4.1.4** Two challenges may be submitted at the same time, one by either team if that challenge action occurred in the same sequence of action in a short time interval (e.g. back row attack and touched by blocker). In this case, the Challenge procedure will be conducted according to the order of Teams challenge request one after another with the processes described in 4.1.3.
- 4.2** At the end of the rally, teams may only request a review of action that ended the rally;
- 4.2.1** Teams must request a Challenge within eight (8) seconds (immediately) after the rally is ended with the 1st referee's whistle. Teams cannot request a Challenge for the actions taken place earlier in the rallies.
- 4.2.2** The referees will allow a challenge only a maximum of 8 seconds from the moment a point is put into the e-score system (or after the 1st referee's decision signal), Exception: The case described in item 10 below, where extra time may be needed in order for the referee to reduce a potential human error.
- 4.2.3** Where a team at the end of the rally pressed the buzzer to request a challenge but fails to - Select and show the proper Challenge sign of fault within the eight (8) seconds, then the team will be sanctioned with the loss of one of its challenge for that set.(i.e. unsuccessful challenge). If a team challenges the final action that this team WON the rally, the Challenge will automatically be rejected by the referee, without sanction. (as it is unnecessary).
- 5.** Teams will keep the right to request a Challenge until they have two unsuccessful Challenges in a set.
- 6.** Where a Challenge is requested all other match actions must stop (be delayed) (e.g. request for Time Out, Libero replacement or Substitution) as those actions may be impacted by the result of the Challenge.
- 7.** The challenge request may be made through two consecutive actions.
- 7.1** First, a team staff must press the buzzer to start a request for a Challenge - The buzzer sound will get the attention of the referees (the coach may show a hand signal of Challenge to the referee at this moment).
- 7.2** Second, a team staff must show the proper Challenge sign of fault to the referees (AVC will not use tablet) - The team must not spend more than eight (8) seconds to indicate their suspected fault. The two-step procedure is designed to help coaches in selecting the correct Challenge sign of fault. In case of delay, the referee may reject their Challenge request and consequently issue a "delay sanction".
- 8.** When team request a challenge, the 1st referee will immediately inform to the Challenge Referee of the suspected fault being challenged. The examination of the images will be conducted as quickly as possible, but the precision of judgement must prevail over speed.
- 8.1** The Challenge Referee will inform to the 1st Referee about what has been revealed by the review of video images directly via the Referee Communication device (headset). The

challenge referee will then request the video image and challenge result be display. As soon as the image of the challenge is shown on the arena screen, the 1st Referee will show the final decision by hand signal for the scoring team and a signal of next serve.

8.2 After the result of the Challenge has been transmitted on the screen, the match continues with a score adjusted as necessary.

9 Consequences of successful / unsuccessful Challenges:

9.1 A second unsuccessful Challenge by a team in a set will result in that right to Challenge being terminate for the remainder of that set (no more Challenge is permitted in that set).

9.2 In case of 9.1 above, the coach will be informed accordingly by the 2 nd Referee.

9.3. The number of remaining Challenges for each team will also be part of the information displayed on the score boards in the competition venue.

10 The 1st referee's right to call a Challenge

10.1 At the end of any rally, the 1st Referee has a right to request a review of actions before making final decision that he/she feels unclear about his/her final decision. If this is the case, the 1st Referee will firstly whistle and then show the challenge hand signal with both hands (indicating that he/she is asking for a Video review). This action immediately triggers the Video review process. The 1st Referee's right to ask for a challenge is one more way to reduce a potential human error and to ensure that the final decision is accurate.

10.2 The referee's right to call a Challenge is independent of the team's right to call a Challenge. Thus, after the 1st referee completed such a challenge, the team losing the rally as the result of this process still has a right to request a Challenge on the final actions of that rally within the same interruption.

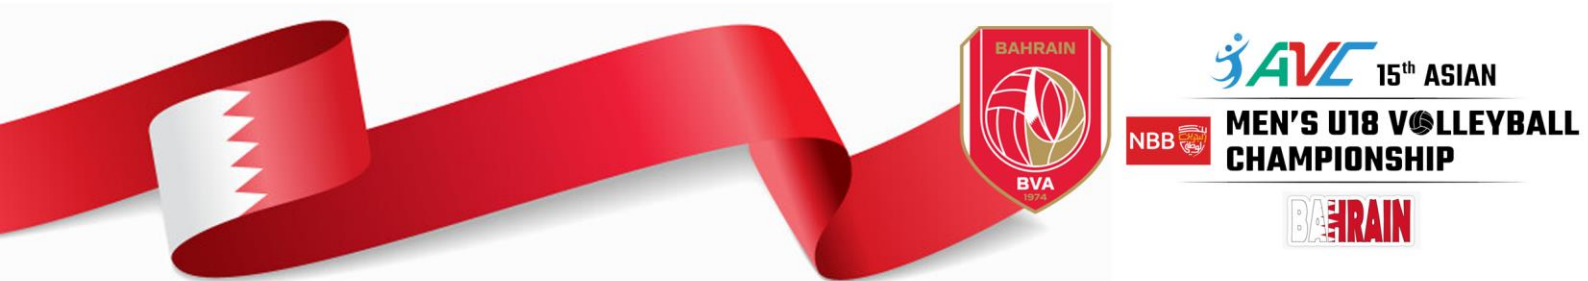

11 It is important to emphasize that the first fault observed in the sequence of images under review, even if it is not the specific action being challenge, will prevail over any subsequent fault. The Challenge referee will advise the 1st referee of this situation and this will be the basis of the 1st referee final decision. For example, see the following case:

11.1 Case 1: Team A request a Challenge for "Block Touch" of Team B, but the image showed a foot fault of the Attack (3-meter) line by the attacker of Team A.

Case 2: The 1st referee's signal of Block Touch by Team B. Then Team B request Challenge for "Block Touch" and the image showed No Block Touch by Team B which means an incorrect judgment by the 1st referee. However, the images showed a net contact by the blocker of Team B.

Case3: The referee call "Net Fault" by Team B then Team B request Challenge for "Net Fault" the images showed "No Net Fault:" But the images showed one of blocker penetrate centerline at landing.

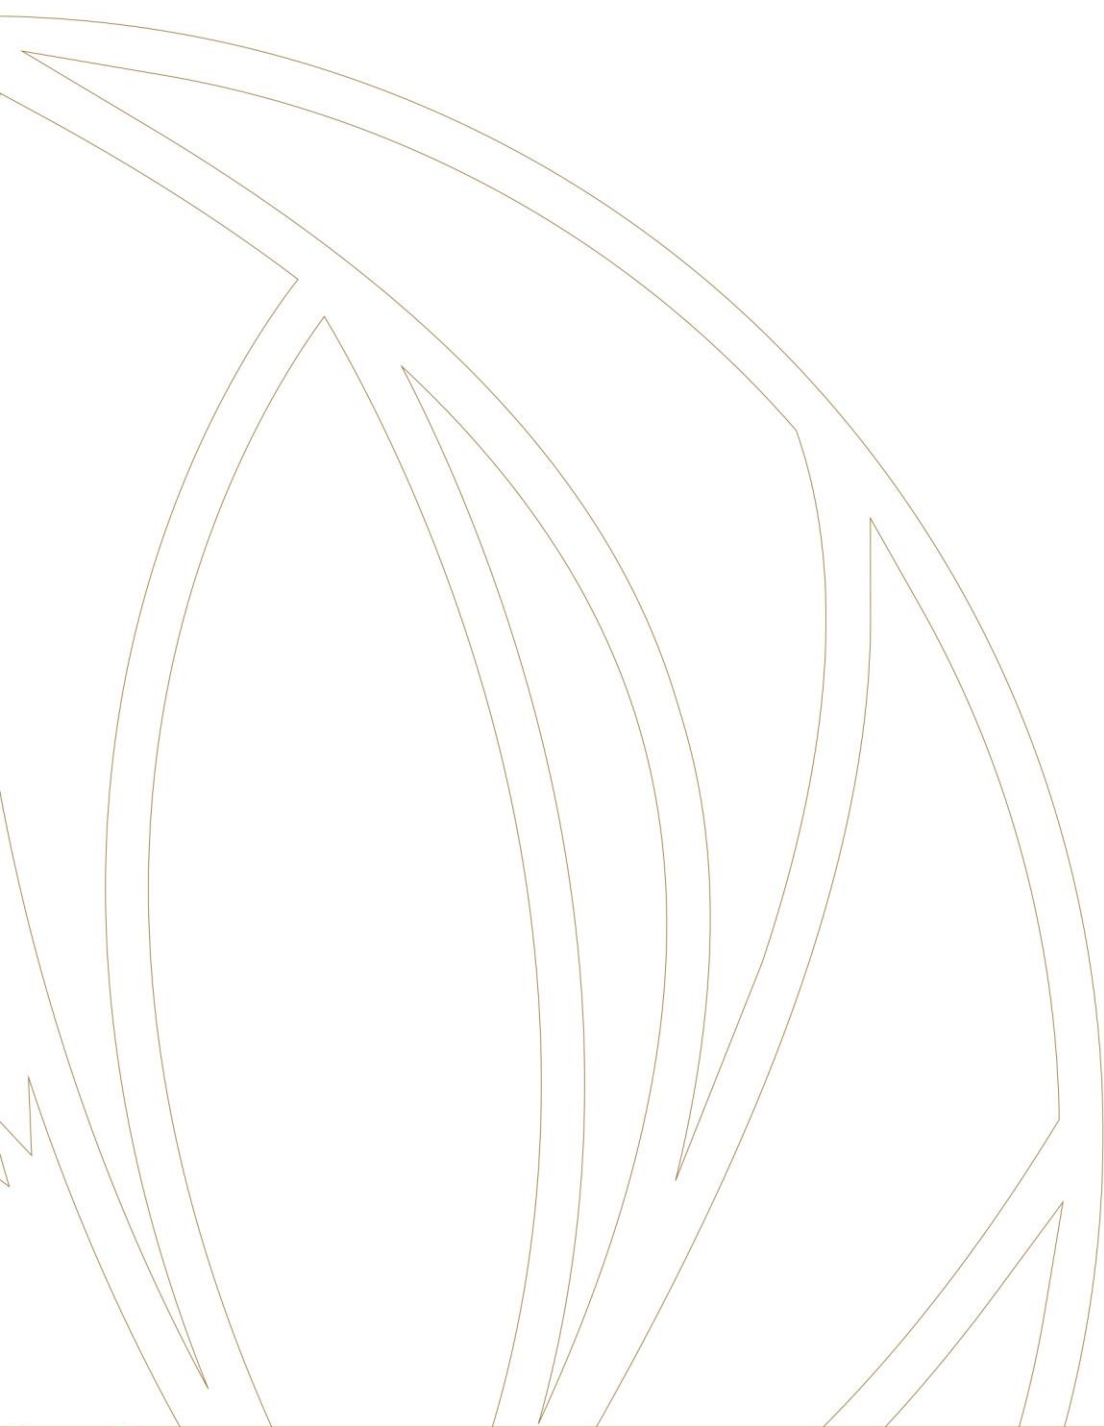

Case4: At the collective of blocking by team A and with very nice action of attacking by Team A. the 1st referee gave a point for team A. Team B. request Challenge for Net Fault by team A. the image showed "No Net Fault". But the images showed one of blocker contact the ball two times consecutively before the end of rally. However, the images showed: a foot fault of the Attacker (case1), a net contact by the blocker of Team B.(case2) blocker penetrate centerline at landing(case3) and the blocker contact the ball two times consecutively before the end of rally(case4) all are prevail over the specified Challenges of the teams, and both teams still keep the number of Challenges available as the fault actions called by the referee were not the ones specified by the Teams' challenge.

- 12** Teams may request only one Challenge within the one only one game interruption – (i.e. they cannot request a second challenge within the same interruption). However, both teams may request a Challenge one by one within the same interruption.
- 13** If two teams challenge at the same interruption for actions which happened within a very short time interval - same action-phase – (i.e. a completed attack hit from the back row is Challenge by team A. for “Foot fault” whilst team B challenges for a “Net fault” by the blocker in team A. which is part of the same action sequence – then the whole sequence of these actions will be reviewed and the first fault observed, if any, will prevail.
- 13.1** If the current video challenge system and video images being used in the competition are not capable of separately reviewing the simultaneous actions in real time (i.e., split-screen device), the referee is the one who decides which action comes first based on the final actions of the video images available at hand.
- 13.2** When both teams request a challenge for the final actions at the end of rally, and both teams were successful as evidenced through review of video images, the first referee, in cooperation with the Challenge referee) will make a decision regarding which fault action occurred first based on the video images or by their judgment (in case of unclear video images). Afterward, the 1st referee should give the final hand signal of serve to the team who did not commit the first fault. Therefore, a “successful challenge” does not automatically mean this team wins the rally.
- 13.3** In case of 13.2, the team which had a “successful challenge”, but was then overruled through the successful challenge of the opponent will retain their Challenges according to Item 5 above.
- 13.4** Examples of the cases 13.2 and 13.3: The referee made a signal of the Block Touch by Team B at the moment of an attack by Team A (the attacked ball went “OUT”) and thus gave a point to Team A.
- a) Team B requested a Challenge for Block Touch (No Block Touch). The review of video images reveals that there was NO block touch (thus “successful challenge).
 - b) Immediately after this, Team A request a challenge for “Net Touch” by Team B, and the review of video images reveals that there was a Net Touch fault by Team B.
 - c) Since both challenges were “successful”, the referee, before making a final decision, must determine whether or not the “Net Touch” by Team B occurred before or after the attacked ball by Team A was “Out”.
 - d) If the Net Touch by Team B was found to be committed before the attacked ball was Out, then Team A wins the rally. However, if the Net Touch was found to be committed after the attacked ball was Out, then Team B wins the rally.
 - e) Since the evidence demonstrated that the faults claimed by both teams occurred, both teams will keep the number of Challenges available.
- 14** All players in play must remain on the playing court during the Challenge process. No substitutions for any players or Libero replacements, nor bench personnel may enter the playing court.

- 15 As a general principle, **any** suspected fault that is NOT CONFIRMED by the video images is to be considered as NOT having occurred.
- 16 The result of the Challenge or Video Review process as displayed by the 1st referee hand signal, is final and non-appealable (Cannot protest this decision).
- 17 In the case where the video image is not clear enough to make an accurate decision or the computer freeze at a moment (computer break down) the Challenge Referee will first communicate the situation to the 1st referee and then the decision of the referee remains valid and respected (both game captains should be informed accordingly of this situation). The number of Challenges available for the team remains unchanged.
